

1. **PG FIX 100 Silicone**:

- This product is a silicone-based sealant, ideal for sealing joints and gaps in various construction projects.
- It features good adhesion properties and can be used in diverse building applications.
- The tube design includes a pointed nozzle for precise application.
- It is marked with "Liquid Nail," indicating strong adhesive capabilities.
- The tube is white with red and blue text, providing clear instructions for use.

2. **G FIX 105 Silicone**:

- Another silicone-based sealant, perfect for a wide range of construction needs.
- The tube is white with green and black text, and it includes images of construction scenes.
- This product offers excellent adhesion and a pointed nozzle for easy application.
- It is versatile and strong, suitable for various building materials.

- Clearly labeled for user convenience.

### 3. **Rasch Fix 600**:

- This specialized siliconized sealant is designed for effective sealing and bonding.
- It offers good adhesion, making it useful for sealing joints and gaps.
- The tube is white with pink and blue text, and it features a pointed nozzle for precision.
- Suitable for a range of construction applications.
- It ensures a strong, reliable seal in various materials.

### 4. **Rasch Pro Adhesive**:

- This is a polyvinyl acetate (PVA)-based adhesive, ideal for bonding different materials.
- The jar design allows easy access to the adhesive for application.
- It is marked with "801" and "PVA," indicating its strong bonding properties.
- The jar is white with a red lid and blue and pink text.
- Suitable for both construction and DIY projects.

### 5. **Rasch Pro Liquid**:

- This liquid adhesive is also PVA-based, designed for versatile bonding applications.
- The clear bottle allows users to monitor the adhesive level easily.
- It is labeled with "A646" and "PVA," highlighting its strong bonding capabilities.
- The bottle has a white cap and blue and pink text.
- Perfect for both professional and DIY uses.

### **RASCH A646:**

- This product appears to be a type of liquid adhesive or chemical solution, as indicated by the text "A646" on the label.
- The bottle is clear plastic with a white cap, containing a clear liquid.
- The label has text in Russian, which suggests it might be manufactured or primarily distributed in a Russian-speaking region.
- The label is predominantly blue with red and black text, featuring the brand name "RASCH" prominently.
- It is likely used in construction or DIY projects for bonding or sealing purposes.

### **RASCH PRO 801 PVA Glue:**

- This is a high-quality polyvinyl acetate (PVA) adhesive, ideal for a variety of industrial applications.
- The container has a red cap and a predominantly blue and pink label.
- The label, written in Russian, includes phrases such as "801," "С лучшим качеством" (with the best quality), and "Неразъемное соединение в Иранской промышленности" (permanent bonding in the Iranian industry).
- This product is designed for strong, permanent bonds and is suitable for materials that require superior adhesion.
- It is commonly used in industrial settings for bonding various materials under normal conditions with medium moisture content.
